JUNIOR FULL STACK DEVELOPER

I'm a passionate junior full stack developer with a background in professional football, eager to leverage my technical skills in Python, Javascript to contribute to innovative software solutions. I have strong passion to build React Native apps. I'm seeking a junior role where I can apply my adaptability, teamwork, and continuous development mindset to drive impactful outcomes in a dynamic environment.

SKILLS

Python
Flask
PostgreSQL

Javascript
Node
RESTful APIs

React
React Native
MongoDB

KEY COMPETENCIES

Communication
Teamwork
Leadership
Innovation

Adaptability
Creativity
Integrity
Ambition

Problem-solving
Multi-tasking
Flexibility
Commitment to excellence

PROFESSIONAL EXPERIENCE

Football Player(20 years)

- Demonstrated strong adaptability and versatility by excelling in various positions and playing styles across professional football leagues in Italy.
- Served as team captain, providing exceptional leadership both on and off the field to motivate teammates and foster a positive team culture.
- Actively engaged in community initiatives, leveraging football as a platform for social change and advocating for the positive impact of sports in society.

Cilento damare - www.cilentodamdare.eu

Full Stack Developer

- Developed a robust Flask-based application featuring an integrated boat reservation system, secure Stripe payment gateway, multilingual support across three languages, and secure admin access through Authentication.
- Developed robust RESTful APIs to manage backend operations, using PostgreSQL for efficient data handling and ensuring seamless communication between the frontend and backend.
- Achieved significant traffic growth by attracting 10.5K visitors in a single month (August 2023) for a Boat Tour Company's website, recognized by a leading Italian Tour Operator for its captivating design and user-friendly functionality.
- Earned feedbacks for creating a visually appealing, easy-to-navigate website that enhanced user experience, leading to increased engagement and acknowledgment from a prominent industry partner.

Cilento Ruben Boats - <https://cilentorubenboats.it>

Full Stack Developer

- Developed a user-friendly boat rental website using React and Node.js, enhancing the user experience with a versatile booking system that includes skipper-led rentals, self-handled rentals, and guided coastal tours.
- Implemented RESTful APIs and a complex admin panel for managing backend operations, utilizing MongoDB for dynamic data handling, and providing comprehensive oversight and control of bookings, rentals, and user management.
- Integrated Stripe for secure online payments, enabling seamless booking and payment processing, while the admin panel allows behind-the-scenes management of transactions and service configurations to boost accessibility and customer satisfaction.

Officina del corpo - <https://officinadelcorpo33.eu.pythonanywhere.com>

Full Stack Developer

- Designed and implemented a comprehensive web application for a Gym Company, streamlining member subscription management by allowing easy addition, deletion, and adjustment of subscription expiration dates, leading to a more efficient administrative process.
- Automated member communication by developing a feature that sends text message alerts for expired subscriptions, improving member engagement and reducing administrative workload through timely notifications.
- Enhanced overall user experience and operational efficiency by creating a web application that effectively handles subscription-related tasks, reducing manual efforts for gym administrators and ensuring a seamless, convenient service for members.

Free Buys (Full E-Commerce Project) <https://github.com/DamianMan/free-buys>

Full Stack Developer

- Developed a visually appealing e-commerce platform using the MERN stack (MongoDB, Express, React, Node.js), with an emphasis on user-friendly design and seamless navigation to enhance the shopping experience.
- Implemented RESTful APIs for core functionalities, including product management, basket creation, and order processing, with backend services optimized for performance, security, and scalability.
- Integrated Stripe for secure payment processing, utilizing Stripe webhooks for real-time transaction updates and ensuring smooth and reliable payment workflows.
- Connected DHL API for dynamic shipping cost calculations, providing accurate delivery estimates, and implemented JWT-based authentication to ensure secure user access and data protection across the platform.

EDUCATION & CERTIFICATIONS

I.T.C.G "E.Cenni"

High School Diploma - Accountant Programmer

final evaluation: 93/100

sept 2000 - july 2005

The Complete Python Pro Bootcamp

Teached by lead instructor, invited by companies such as Twitter, Facebook and Google to teach their employees, at the London App Brewery, London's leading Programming Bootcamp.
